Figure 2

this table examines the relationship between the level of development of the regions and the number of millionaires and the total wealth earned.

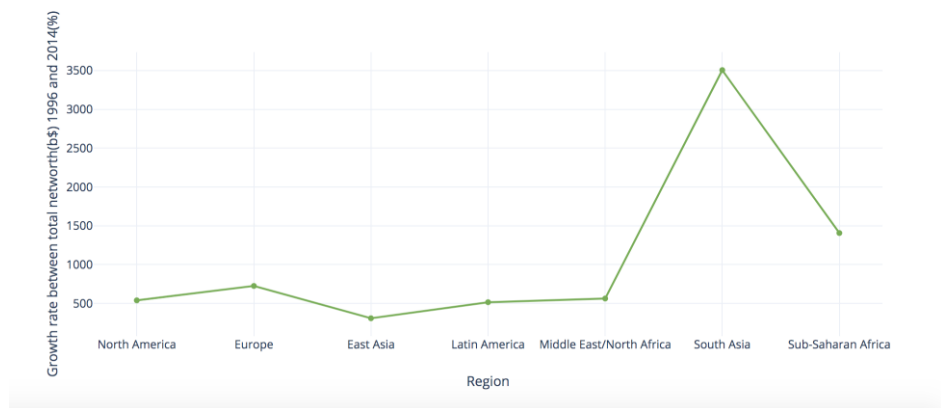

Figure 2.1

As we can see from this graph, total net wealth ratios in developing countries have increased considerably over the years, while in developed countries this increase has been very low.

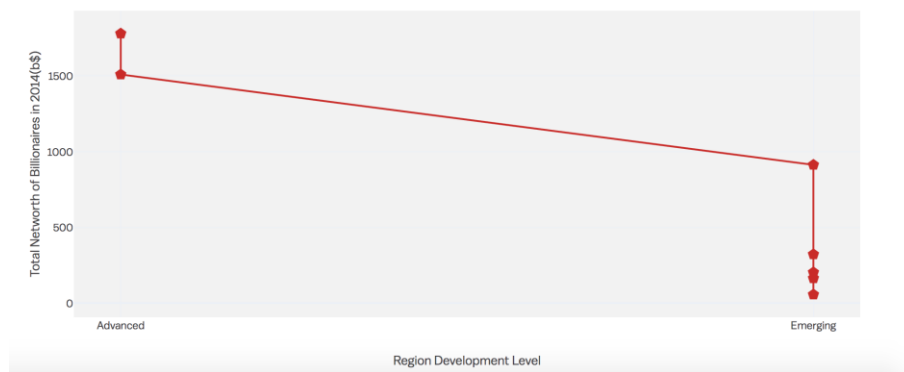

Figure 2.2

However, in 2014, Advanced countries are far ahead of Emerging countries by total net wealth.

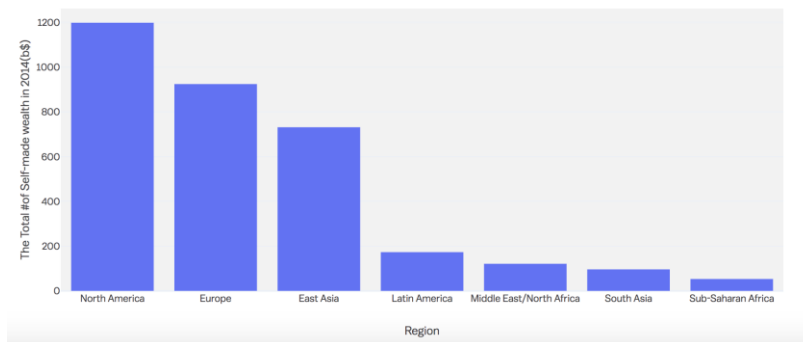

Figure 3.3

If we look at the table in figure 3.1, we can observe a significant increase in the total self-made wealth of North America and Europe.

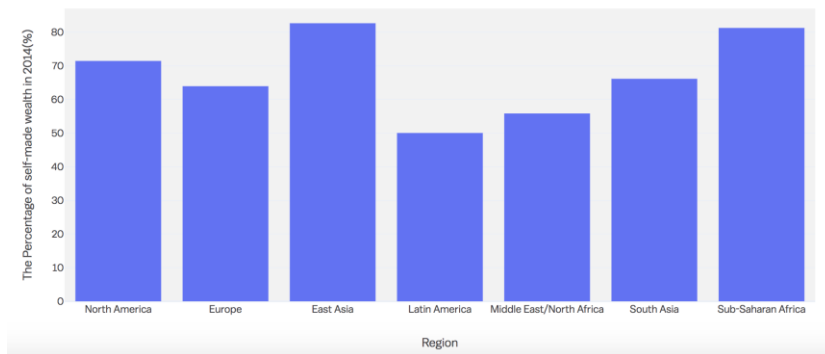

Figure 3.4

From this table, the percentage of self-made in developing countries is very high. This means that in developing countries new companies are opening up and trying something.
